

Environmental Compromise Code

Arolen is compromised with the preservation of the environment and with the friendly practices that will have that end, that's why Arolen Company, its share holders, its managers, its officers, its employees and its partners approve and accept:

1. Recognizes that the environment is a valuable asset that we have to care.
2. Develop all and each one of the daily practices – as small or irrelevant that they appear – with an absolute respect thru the environment.
3. Promoting and maintaining internal recycling campaigns.
4. Promoting and maintaining internal save energy campaigns
5. Caring for water as an essential element for life and for environment conservation.
6. Offering Only services and products friendly with the environment.
7. Being responsible with the use of products from non renewable sources.
8. Establishing and checking the environmental objectives and goals based on the nature, scale and environmental impacts from the company's activities, products and services.
9. Compromise to comply with the environmental legislation and any other environmental requirement.
10. Preventing the pollution of natural resources.

Only if we are willing to comply with the previous statements, we have made our corporate environment contribution, essential basis for our own and the earth planet surviving.
